KAMALESAN C

AI Engineer | Generative AI, AI Agents & Python Automation

Coimbatore, India (Open to Remote & Visa Relocation) +91 7305131264 kamaleshcai686@gmail.com LinkedIn

GitHub

PROFESSIONAL SUMMARY

Versatile and results-driven AI Engineer with 7.4 years of robust software engineering and automation experience, specializing in Generative AI, LLM applications, autonomous AI agent workflows, and backend API platforms. Proven record of developing production-grade AI solutions including multi-agent governance frameworks, AI-powered engineering test automation, and full-stack REST microservices with Python, FastAPI, Docker, and vector databases. Strong background in complex system architectures, test automation, and prompt engineering, dedicated to building reliable, high-performance intelligent software.

TECHNICAL SKILLS

Generative AI & LLMs:	Gemini API, OpenAI API, LLM Applications, Prompt Engineering, RAG Architectures, Vector Databases, MCP
AI Agents & Workflows:	Multi-Agent Systems, Autonomous Workflow Orchestration, n8n, Human-in-the-Loop AI Automation
Languages & Backends:	Python, FastAPI, REST APIs, SQLAlchemy, PostgreSQL, Redis, React, Embedded C
DevOps & Cloud:	Docker, Git & GitHub, Google Cloud Platform (Cloud Run), Linux, CI/CD Pipelines

KEY AI & SOFTWARE PROJECTS

AI-Powered SIL Test Automation Platform **2024 – 2026**

Python, FastAPI, Generative AI (LLMs), Prompt Engineering, Automated Diagnostics

- Designed an end-to-end intelligent platform that parses test requirements and auto-generates test scripts for software validation.
- Integrated LLM-assisted failure triage, reducing diagnostic turnaround time and accelerating regression cycles.
- Built responsive FastAPI backend services handling structured telemetry, automated reports, and execution monitoring.

EpiAgent PMO — AI Project Governance & Risk Platform **2024**

Python, Gemini API, Multi-Agent Architecture, Vector Search, Streamlit/FastAPI

- Architected multi-agent system coordinating automated PMO risk assessments, milestone tracking, and compliance audits.
- Implemented context-aware RAG pipelines querying unstructured project documentation to surface delivery blockers.

Automation Job Applying & Outreach Agent **2026**

Python, FastAPI, Playwright, ATS Handlers, OpenPyXL, HTML/CSS UI

- Developed dual-role autonomous job-hunting engine scraping, scoring, and auto-applying to international job boards.
- Integrated human-in-the-loop approval workflows, ATS resume matching, and recruiter outreach generation.

PROFESSIONAL EXPERIENCE

Senior Software Engineer / Automation Engineer **2019 – Present**

Capgemini Technology Services (Client: Bosch Global Software Technologies) Coimbatore, India

- Led Python automation architectures and system-level validation for mission-critical software deployments.
- Engineered custom test harnesses, automated verification pipelines, and analytical data export utilities.
- Collaborated across international engineering teams to deliver high-quality releases under strict SLAs.

CERTIFICATIONS

- **Generative AI Mastermind** — OutSkill
- **AI Foundation & Prompt Engineering** — Udemy
- **n8n Masterclass: AI Automations & Workflows** — Udemy

EDUCATION & MOBILITY

- **Master of Computer Applications (M.C.A)** — Bharathidasan University
- **Mobility:** Open to Worldwide Remote & International Visa Relocation
- **Languages:** English (Professional), Tamil (Native)
